+974 5027 5500

Hands-on CTO and founding engineer building SaaS, mobile and AI products, with ownership across product architecture, engineering delivery and cloud infrastructure.

EXPERIENCE

PortzApp

Chief Technology Officer

Jun 2026 - Present

Founding Engineer / Tech Lead

Jun 2025 - May 2026

- Architected and shipped a **Laravel, React and Inertia.js** replacement for a legacy **.NET** application, addressing performance and maintainability issues for a product with paying customers.
- Built an **in-app AI assistant** using **Laravel AI SDK** and **Microsoft Foundry** models, exposing application workflows as callable tools so users can ask questions and execute product actions in natural language.
- Built **Laravel** workflows for **Stripe** billing, **Redis** queues, scheduled jobs and real-time updates.
- Deployed containerized workloads on **Kubernetes** and automated **Azure** infrastructure provisioning across deployment environments with **Terraform**.
- Established automated and **end-to-end tests**; sharded **CI test execution**, reducing pipeline runtime from **over 20 minutes to under 5 minutes**.
- Integrated **OpenTelemetry** instrumentation, **Sentry** error monitoring, **PostHog** analytics and automated **Slack alerts** for production diagnostics and product-usage visibility.
- Owned **technical architecture and release planning** across web and mobile, translating customer requirements into implementation priorities and guiding delivery through code reviews.
- Built **coding-agent harnesses** with reusable **skills** and **MCP integrations** to automate review loops, scheduled performance and security checks, and dependency upgrades.

Trilogy Health

Jun 2024 - May 2025

Lead Mobile Engineer / Contract

Ongoing maintenance support following the core engagement.

- Led the architectural overhaul and production launch of a legacy health app using **Expo and React Native**, with ongoing responsibility for maintenance.
- Implemented **Convex** data and real-time synchronization, **Clerk** authentication, and **Apple HealthKit** and food-data API integrations.
- Applied **Effect** to compose TypeScript workflows with explicit error handling, retry policies and observability.
- Shipped **RevenueCat** subscriptions, **Sentry** release monitoring and **PostHog** product analytics.
- Automated iOS and Android releases with **EAS Workflows** and **Expo fingerprinting**, routing compatible changes to **OTA updates** and native changes to new builds and app store submission.

Parabola9

Feb 2025 - May 2025

Software Engineering Consultant

- Co-architected and implemented a **customer-facing dashboard** spanning authentication, database and frontend, and contributed to the architecture and implementation of an **agentic AI workflow**.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, Python, SQL, C#

Web & Mobile: React, Next.js, Laravel, Inertia.js, Node.js, Expo, React Native, Astro, Tailwind CSS

Libraries & Data: Effect, PostgreSQL, Redis, Convex, Prisma, Drizzle, REST APIs, tRPC, WebSockets

Cloud & Delivery: Azure, AWS, Terraform, Kubernetes, Docker, GitHub Actions, CI/CD, Linux

Observability & Testing: OpenTelemetry, Sentry, PostHog, Playwright, Vitest, Jest

Identity & Payments: Clerk, OAuth, Stripe, RevenueCat, Apple HealthKit

AI Engineering: Laravel AI SDK, tool calling, coding-agent harnesses, MCP, agent skills, LangChain

EDUCATION

Leeds Beckett University

Leeds, UK

Master of Engineering in Computer Science (MEng)

2020 - 2024

Distinction; ranked first in class. Coggni Prize for Outstanding Contribution in Computer Science.
